Effective, Efficient, and Meaningful 21st CCLC Evaluations
Workshop Reflection Worksheet

What do you want to be able to meaningfully say at the state or local level?

What data will you need to document this?

How can you collect this data efficiently for use at the site, grantee, and state level?

What needs to be in place to make the most effective use of the data for quality improvement, public awareness, and policy work?

A copy of the presentation and additional documents not distributed during the session can be found at www.moasn.org/evaluation.
